or email **[mychart@childrenscolorado.org](mailto:mychart@childrenscolorado.org)**

MyChart is not intended to be used for urgent needs.

# Access to a child's chart will vary depending on the child's age

## **Under the age of 14**

Parents/guardians will have full access to all aspects of the child's MyChart, including appointments, medications, test results, and more.

## **Ages 14-18**

Parents/guardians will have limited access. They will have the ability to message the patient's provider(s), view immunizations, but they will no longer be able to view test results and appointments. The 14-18 year old patient will have full access to their MyChart.

## **18 years or older**

Parents/guardians will no longer have any access to the patient's MyChart, while the patient over 18 years of age will have full access to their MyChart.

## **Special needs**

If a child is 14 years of age or older, with special needs, and unable to manage their own healthcare, a special allowance will be made allowing parents/guardians to maintain full access to all aspects of the child's MyChart. Please talk this over with your child's healthcare team.
